- Configurable Accounting Rules

Clientside TESTING

# Workday Testing Considerations

Empowering You To Deliver On Quality.

# Typical Workday Testing Considerations

**05 User Acceptance Testing**
Coordination of User Acceptance Testing by designated users.

**04 End To End Testing**
End to end, functional test coordination to assure key business processes.

**03 Functional Integration Tests**
Testing with 3rd Party vendors to assure inbound and outbound data flows, validation rules & mapping logic.

**02 Technical Integration Tests**
Hands on, technical testing of 3rd party integration schedules, file transfer protocols, data flows and error handling processes.

**01 Unit & Configuration Testing**
Validation of the specific Workday user roles, security groups, cost centres, pay groups and organisational hierarchies.

# Workday Implementation Testing Options

# Testing Options For Workday Implementations

**Clientside** TESTING

To guarantee optimal quality, compliance and timely deliveries, bronze, silver and gold testing options encompass a range of testing methodologies such as unit, integration, functional end to end, browser and device compatibility testing. Choosing the right Workday testing option for your organisation to ensures successful implementation and deployment of Workday for your organisation.

## 01 — BRONZE

**Key Features**

- Pragmatic testing driven by need for speed and timely completion.
- Tests cover bespoke customisations, key processes, integrations & compliance reports.
- Quickest test completion time.
- Good level of confidence based on stringent validation of your critical paths.

## 02 — SILVER

**Key Features**

- Risk based Testing guided by your risk appetite, schedule and budget.
- Functional Tests (Unit, Integration, E2E Testing).
- Non Functional Tests (Device/Browser Compatibility).
- Streamlined test effort based on recommended scope.
- Strong confidence levels as test completion based on successful coverage of recommended tests for safe Workday deliveries.
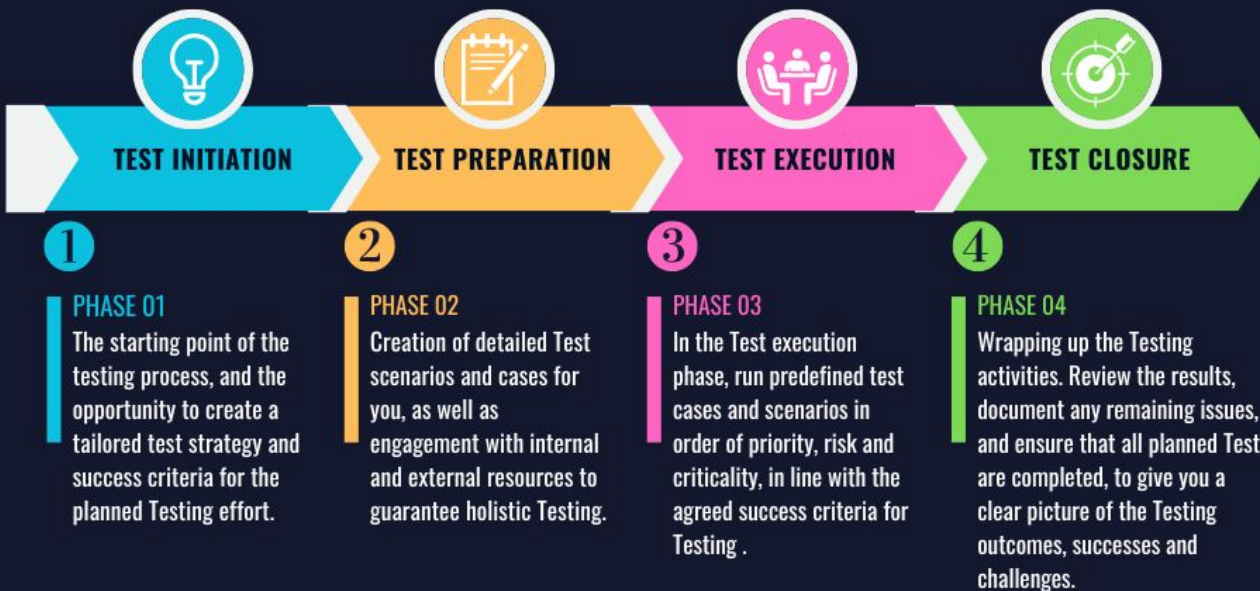

## 03 — GOLD

**Key Features**

- Strongest test coverage.
- Positive and negative testing.
- Functional tests (Unit, Integration, E2E Testing).
- Non Functional tests (Device/Browser Compatibility)
- Highest confidence levels as test completion based on successful completion of robust test coverage.
- Quality guarantees.
- Maximum testing effort driven by need for quality.
- Extensive testing time and effort.

# Workday Testing Life Cycle

Empowering You To Deliver On Quality.

# Testing Life Cycle

**TEST INITIATION**

**TEST PREPARATION**

**TEST EXECUTION**

**TEST CLOSURE**

**1**

**2**

**3**

**4**

**PHASE 01**
The starting point of the testing process, and the opportunity to create a tailored test strategy and success criteria for the planned Testing effort.

**PHASE 02**
Creation of detailed Test scenarios and cases for you, as well as engagement with internal and external resources to guarantee holistic Testing.

**PHASE 03**
In the Test execution phase, run predefined test cases and scenarios in order of priority, risk and criticality, in line with the agreed success criteria for Testing .

**PHASE 04**
Wrapping up the Testing activities. Review the results, document any remaining issues, and ensure that all planned Tests are completed, to give you a clear picture of the Testing outcomes, successes and challenges.

# Why Choose Us

Empowering You To Deliver On Quality.

# Testing Deliverables

**Test Strategy**
- Tailored Test Strategy.
- Test Preparation & Burn Estimates.

**Test Plans**
- Test Plans.
- Test Schedule (Plan On A Page).

**Test Scripts**
- Test Scenarios.
- Test scripts.

**Test Progress Reports**
- Test Monitoring.
- Test Reporting.

**Test Closure Reports**
- Test Completion Statistics.
- Test Closure Summary.

**Defect Summary Reports**
- Incident Summary.
- Defect Caveats.

# Why Choose Us

## Clientside TESTING

With Clientside Testing, quality isn't just a goal; it's a standard we uphold.

### Client Side Test Focus
Enjoy dedicated, client side Workday Testing expertise, representation and support based on your quality goals and key success criteria.

### Cost Saving
Take advantage of cost savings though comprehensive, end to end testing that meets your timeline & budget.

### Resource Optimisation
Prioritise service delivery & optimise internal resources by leveraging our Testing capabilities.

### Test Advisory & Consultancy
Expertise and guidance to deliver tailored testing strategies to guide your path to Testing excellence.

### Quality Assurance
Industry best practices for adopting Workday modules and software updates.
