Integration Testing Overview

Finance Integrations
Verify transmission of financial data between Workday and external finance systems, including general ledger, accounts payable, and receivable, ensuring accurate financial reporting and compliance.

Job Site Interfaces
Ensure seamless integration between Workday and job sites for job postings, candidate applications, and recruitment processes.

01.

02.

03.

04.

05.

Payroll Integrations
Validate Payroll data flows between Workday and your Payroll systems, ensuring accurate synchronisation of employee compensation, tax withholdings, and deductions.

HR Integrations
Assuring employee data flows between Workday and your HR systems, including benefits administration, time and attendance, and performance management.

Learning Partners
Guarantee robust integrations between Workday and learning management systems or training partners for employee training and development programs.

Integration Testing Lifecycle

We undertake rigorous Testing of inbound and outbound, 3rd Party Integrations with Workday. From timesheets to tax deductions, employee, payroll and financial data, our strategic approach assures integration schedules, error handling and file processing protocols, to minimise discrepancies and enhance operational efficiency.

File Validation

Positive and negative testing of file transfer rules, file formats, sensitive and mandatory fields.

Outbound Files

Testing of outbound Integration schedules, validation rules, mapping logic and end to end processes.

Data Reconciliation

Collaborative, Data Reconciliation Testing with internal and external stakeholders, to assure data flows, data accuracy and reliability.

Inbound Files

Quality assurance of specific validation rules, mapping logic and end to end processing of inbound files.

Error Handling

Verification of error handling protocols, to assure file extraction, load and transfer (ETL) processes.

Testing Deliverables

Integration Test Strategy
- Tailored Integration Test Strategy.
- Integration Test Preparation & Burn Estimates.

Integration Test Plans
- Integration Test Plans.
- Integration Test Schedule (Plan On A Page).

Integration Test Scripts
- Integration Test Scenarios.
- Integration Test scripts.

Integration Test Progress Reports
- Integration Test Monitoring.
- Integration Test Reporting.

Integration Test Closure Reports
- Test Completion Statistics.
- Test Closure Summary.

Defect Summary Reports
- Incident Summary.
- Defect Caveats.

Why Choose Us

Clientside TESTING

With Clientside Testing, quality isn't just a goal; it's a standard we uphold.

Client Side Test Focus
Enjoy dedicated, client side Workday Testing expertise, representation and support based on your quality goals and key success criteria.

Cost Saving
Take advantage of cost savings though comprehensive, end to end testing that meets your timeline & budget.

Resource Optimisation
Prioritise service delivery & optimise internal resources by leveraging our Testing capabilities.

Test Advisory & Consultancy
Expertise and guidance to deliver tailored testing strategies to guide your path to Testing excellence.

Quality Assurance
Industry best practices for adopting Workday modules and software updates.
